## - Care Motion

TiMOTION's TA29 is one of our new generation medical actuators, which can lift up to 6,000N, yet has compact installation dimension. In addition to this, its IP rating is up to IP66W. The TA29 is highly recommended for various medical applications that require a short retracted length, yet need to support a large force, such as the leg adjustment or sling angle actuator on the patient hoist system.

## General Features

| Voltage of motor | $12,24 \mathrm{~V}$ DC; 12, 24V DC (PTC) |
| :--- | :--- |
| Maximum load | $6,000 \mathrm{~N}$ in push |
| Maximum load | $4,000 \mathrm{~N}$ in pull |
| Maximum speed at full load | $17.7 \mathrm{~mm} / \mathrm{s}$ |
|  | (with 1500 N in a push / pull condition) |
| Minimum installation dimension | $\geq 178 \mathrm{~mm}$ |
| Color | Black or grey |
| IP rating | Up to IP66W |
| Operational temperature range | $+5^{\circ} \mathrm{C} \sim+45^{\circ} \mathrm{C}$ |
| Suitable for patient hoist application |  |

## Note

1 Please refer to the approved drawing for the final authentic value.
2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.

3 The current \& speed in table are tested with 24 V DC motor. With a 12 V DC motor, the current is approximately twice the current measured in 24 V DC; speed will be similar for both voltages.

4 The current \& speed in table are tested when the actuator is extending under push load.
5 The current \& speed in table and diagram are tested with TiMOTION control boxes, and there will be around $10 \%$ tolerance depending on different models of the control box. (Under no load condition, the voltage is around $32 \mathrm{~V} D \mathrm{C}$. At rated load, the voltage output will be around 24 V DC)
